DETAILED ACTION

1. Claims 1 to 19 are presented for examination.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119, which papers have been placed of record in the file.

Information Disclosure Statement

3. The references listed in the information disclosure statement submitted on 9-15-2004 have been considered by the examiner (see attached PTO-1449).

Drawings

4. The drawings filed on 12-2-2003 are acceptable subject to correction of the indicated informalities. Please provide labels for each element in fig. 1. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or

Art Unit: 2133

remarks, section of the amendment paper. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

Allowable Subject Matter

5. Claims 1 to 19 are allowed.

6. The following is an examiner's statement of reasons for allowance: the prior art made of record teaches a method and an apparatus for performing error correction using multiple error correction codes. For instance, Cansever et al. teaches variable strength error correction with an encoding/decoding method for a packet with a separate encoding/ decoding method for the header and the data wherein a strength field provides information for adjusting the error correction strength. Stieger teaches variable error correction coding for an optical communication system with a variable encoder and a variable decoder wherein a selection of the error correction code is based on achieving optimal correction. Okamoto et al. teaches a decoding method for doubly-encoding Reed Solomon codes wherein a data word is decoded twice in order to correct miss corrections or uncorrected errors.

However, the prior art made of record taken alone or in combination, fails to teach or fairly suggest or render obvious the novel element of the instant invention. I.E., the prior art made of record fails to teach or fairly suggest an error correction method and apparatus with the step of "selecting a second error correction algorithm from the plurality of error correction algorithm when it is determined that the first error correction algorithm is not capable of correction errors in the data."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
